4. OPERATING INSTRUCTIONS

4.1 Place the luggage on flat ground, making sure the upper handle is free of load. Power on the scale unit by pressing the button marked "ON/OFF".

4.2 Keep the luggage on the ground, wait for the zero to be displayed on the LCD.

4.3 Lift the luggage by the upper handle, and hold still for several seconds.

4.4 The total weight of the luggage will display on the LCD display.

4.5 Power off the scale by pressing the button marked "ON/OFF".
4.6 Press the button marked "KG/LB", the LCD display will toggle between KG/LB.
